PROJECTS

1. MERN Stack AI SaaS Chatbot

A robust and secure AI-powered chatbot built with the MERN stack and TypeScript, integrated with OpenAI API for intelligent conversational capabilities.

- Implemented user authentication and JWT-based authorization for secure access.
- Integrated MongoDB for efficient storage and management of chat histories.
- Designed for scalability, data integrity, and a seamless user experience.

2. Quiz Application

An engaging and interactive JavaScript-based quiz platform featuring dynamic questions and real-time scoring.

- Built a responsive UI for smooth user interaction across devices.
- Enabled topic-based question sets for a customizable learning experience.
- Implemented score tracking and performance analysis to enhance engagement.

3. Virtual Personal Assistant

An intelligent assistant designed to manage schedules, reminders, and daily tasks efficiently.

- Automated reminders for events, appointments, and deadlines.
- Built with a user-friendly interface to simplify task management.
- Helps users streamline routines and improve productivity.

CERTIFICATES

- JAVA AND DSA Certificate Program
- IBM Cloud Computing
